CAREER OBJECTIVE

Aspiring software developer and B.Tech Computer Science (AI/ML) student with strong fundamentals in Data Structures, Algorithms, and full-stack development. Passionate about building scalable and efficient web and mobile applications. Seeking software development opportunities where I can contribute to impactful products, work on end-to-end development, and enhance my problem-solving and development skills through real-world experience and continuous learning. Actively exploring modern technologies and building projects to strengthen practical skills and industry readiness.

PROJECTS

Talent-Rush-Pro | GitHub

- Developed a **real-time coding interview platform** with a **LeetCode-like compiler** supporting **50+ programming languages** and **auto-evaluation of code**
- Integrated **live video interviewing system** using **Socket.IO** and **WebSockets** enabling **real-time code collaboration**, screen sharing, chat, and session recording
- Designed a **scalable and secure architecture** with features like **interactive whiteboard**, difficulty-based problem sets, and **instant feedback** for efficient tech hiring

Microservices Cab Service | GitHub

- Built a **scalable cab booking platform** using **microservices architecture** with **MERN stack**
- Implemented core services including **User Service (JWT + MongoDB)**, **Ride Service (Maps API + Socket.IO)** for real-time tracking, and **Payment Service (Stripe)**
- Deployed using **Docker and Kubernetes** with **API Gateway routing**, and integrated **Firebase notifications** for a **reliable and scalable distributed system**

Book Worm App | GitHub

- Developed a **cross-platform book library application** using **React Native (Expo)**, **Node.js (Express)**, and **MongoDB** for efficient data management
- Integrated **AI-powered summarization** to generate **chapter-wise, page-wise, and full-book summaries** along with **key-point flashcards**
- Designed a **user-friendly interface** with optimized backend APIs ensuring **fast content retrieval**, **scalability**, and enhanced reading experience

EDUCATION

Pranveer Singh Institute of Technology (PSIT), Kanpur

Bachelor of Technology in Computer Science (AI/ML)

2023 – 2027

Kanpur, India

- **Coursework:** Data Structures, Algorithms, Database Management Systems, Operating Systems, Machine Learning

SKILLS

Languages : JavaScript, HTML/CSS, SQL, C++, Java

Frameworks & Libraries : React.js, Next.js, Node.js, Express.js, Socket.io, React-Native(expo)

Databases : MongoDB

Tools & Technologies : Git, GitHub, WebSockets, JWT Authentication, REST APIs, Vite, Tailwind CSS, Redux, Redis, Material UI, GSAP
