CAREER OBJECTIVE

Full Stack Developer (MERN) and Computer Science (AI/ML) student with strong foundations in Data Structures, Algorithms, and scalable system design. Experienced in building real-time and microservices-based applications using modern technologies. Seeking opportunities to develop impactful software solutions and enhance backend and system design expertise.

PROJECTS

Talent-Rush-Pro | GitHub Repo

- Developed a **scalable real-time coding interview platform** supporting **50+ programming languages** with **auto-evaluation**
- Implemented **real-time collaboration** using **WebSockets and Socket.IO** enabling **multi-user sessions**, live coding, chat, and screen sharing
- Engineered the system to handle **concurrent coding sessions with low latency** ensuring smooth real-time performance
- Designed a **secure and scalable system architecture** with features like **interactive whiteboard**, instant feedback, and role-based sessions

Microservices Cab Service | GitHub Repo

- Built a **scalable cab booking platform** using **microservices architecture** with **MERN stack**
- Implemented core services including **User Service (JWT + MongoDB)**, **Ride Service (Maps API + Socket.IO)** for real-time tracking, and **Payment Service (Stripe)**
- Deployed using **Docker and Kubernetes** with **API Gateway routing**, and integrated **Firebase notifications** for a **reliable and scalable distributed system**

Book Worm App | GitHub Repo

- Developed a **cross-platform book library application** using **React Native (Expo)**, **Node.js (Express)**, and **MongoDB** for efficient data management
- Integrated **AI-powered summarization** to generate **chapter-wise, page-wise, and full-book summaries** along with **key-point flashcards**
- Designed a **user-friendly interface** with optimized backend APIs ensuring **fast content retrieval, scalability**, and enhanced reading experience

EDUCATION

Pranveer Singh Institute of Technology (PSIT), Kanpur

2023 – 2027

Bachelor of Technology in Computer Science (AI/ML)

Kanpur, India

- **Coursework:** Data Structures, Algorithms, Database Management Systems, Operating Systems, Machine Learning

SKILLS

Frontend : React.js, Next.js, Tailwind CSS

Backend : Node.js, Express.js

Database : MongoDB, Redis

Languages : JavaScript, C++, Java, SQL

Tools & Technologies : Git, GitHub, Docker, Kubernetes, REST APIs, WebSockets, JWT Authentication, Vite, Redux, GSAP, Material UI
